

Can I use boxes with hand holes ?

No, boxes cannot arrive at warehouse with holes, rips or tears. Even if it has a hand hole for lifting, it can be reported as "damaged", causing costly delays.

Please tape over hand holes to avoid damage reports, and to ensure the box is sealed, so moist air (causing mold & mildew) cannot flow into and out of the box.

If box is heavy, fasten with pp bands to enable easy lifting and handling.

NO HANDHOLES (IF NECESSARY TAPE HANDHOLES CLOSED)
